### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Katsuhiko Arai on 01/23/2004.

The application has been amended as follows:

**----- Claim 1 has been amended as below:**

A multi-chamber load-locking device for transferring wafers, said device having an interior divided into (i) an upper chamber and (ii) a lower chamber, and (iii) an intermediate section located between the upper chamber and the lower chamber, which is for loading/unloading wafers,

said device comprising

(a) a single divider plate having an upper side and a lower side, both of which are for temporarily supporting wafers, said plate moving reciprocally between an upper position and a lower position, wherein the plate divides and seals the upper chamber from the intermediate section and the lower chamber at the upper position, and the plate divides and seals the lower chamber from the intermediate section and the upper chamber at the lower position, wherein each of the upper chamber and the lower chamber has a sealing surface where the upper chamber and the lower chamber are sealed with the plate, said sealing surface being formed by an O-ring;

(b) a cylindrical cam structure co-axially linked to said plate, wherein said plate moves between the first position and the second position by the rotation of the cylindrical cam structure; and

(c) a rotary actuator for driving and rotating the cylindrical cam structure, wherein said cam structure comprises

Art Unit: 1763

(1) a cam cylinder having a cam groove which rotates with the rotary actuator, and  
(2) a support cylinder having a cam follower being provided outside the cam cylinder, wherein the plate, the cam cylinder, the support cylinder, and the rotary actuator are co-axial, while the support cylinder is attached to the plate and does not rotate, wherein the cam follower is fitted in the cam groove and moves vertically when the cam groove rotates, said support cylinder, said groove spiraling around a circumference of the cylinder, said groove comprising  
(I) an upper horizontal section for locking the plate at the upper position, where the cam follower is securely locked in the cam groove,  
(II) a lower horizontal section for locking the plate at the lower position where the cam follower is securely locked in the cam groove,  
(III) a straight middle section for moving the plate at a fixed rate,  
(IV) an upper transition section connecting the upper horizontal section and the straight middle section for moving the plate at a rate lower than the fixed rate, and  
(V) a lower transition section connecting the lower horizontal section and the straight middle section for moving the plate at a rate lower than the fixed rate, wherein the length of each section in a horizontal direction is  $(I) < (IV) < (III) > (V) > (II)$ ;  
said device further comprising  
(d) a vertical beam for supporting the support cylinder, provided in parallel to the axis of the support cylinder, and  
(e) a sliding support which slides on the beam,  
wherein said support cylinder is connected to the sliding support, and moves along the beam vertically when the cam cylinder rotates.

----- **Claims 2-6, 8-11 and 15-21 are cancelled.**

#### **REASONS FOR ALLOWANCE**

2. Claims 1, 7, 12, 13 and 14 are allowed.

Art Unit: 1763

3. The following is an examiner's statement of reasons for allowance: Claim 1 is allowable over the prior art of record for the limitation of the rotary actuator and the cam structure being coaxial and the cam cylinder with groove being inside of the cam follower cylinder which is also the support cylinder. These limitations in the context of other limitations of the claim are not fairly suggested or disclosed in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ram N Kackar whose telephone number is 571 272 1436. The examiner can normally be reached on M-F 8:00 A.M to 5:P.M.
